- ✓ Attacks belly fat
- ✓ Boosts your digestion by increasing your body's ability to process fats

Renew

By combining a powerful blend of ingredients, Renew by EMRIS is designed to cleanse your system of harmful toxins, reduce bloating, and attack those pesky problem areas, allowing you to shed the weight you want quickly and easily.

INGREDIENTS

GARCINIA CAMBOGIA

is a tropical fruit also known as the Malabar tamarind. It's revered for its ability to block fat production in the human body and it puts the brakes on your appetite. It could help keep blood sugar and cholesterol levels in check, too.

GREEN COFFEE BEANS

contain compounds known as chlorogenic acids, believed to have antioxidant effects that may help lower blood pressure, and impact weight loss.

RASPBERRY KETONES

are believed to cause the fat within cells to break down more effectively, helping your body burn fat faster. They are also believed to increase the levels of adiponectin, a hormone that helps to regulate metabolism.

AFRICAN MANGO EXTRACT (irvingia gabonensis)

is taken from the seed of African mangoes, native to West Africa and is revered for its weight loss properties, ability to impact and potentially lower cholesterol levels, and improve control of diabetes.

ACAI BERRY EXTRACT (fruit)

Acai berries are bursting with fiber, and fiber gets your system rocking and rolling.

HORNY GOAT WEED (epimedium) EXTRACT (leaf)

supports people with high blood pressure, fatigue, and so much more.

PSYLLIUM HUSK

It increases the bulk in your stool, an effect that helps to cause movement of the intestines. It also works by increasing the amount of water in the stool, making the stool softer and easier to pass. Psyllium, has also been used along with a proper diet to treat high cholesterol.

L-ARGININE

is an amino acid that acts as a vasodilator, opening (dilating) blood vessels. Your body uses arginine to synthesize nitric oxide, helping your blood vessels expand and relax, an important key to regulating blood flow.

YACON ROOT EXTRACT

has been shown to be effective against constipation and may lower blood sugar levels. It's also high in antioxidants and potassium.

Regular ingestion of the

ALFALFA (medicago sativa) (Leaf)

has been found to aid in flushing the bowels of built up toxins and has been widely revered for its diuretic purposes. The alfalfa plant is naturally high in many essential vitamins, including A, D, E, K, and even the full family of B vitamins.
