# HOW SYNERGY WORKS

SCIENCE IS REVEALING SOME ASTONISHING TRUTHS ABOUT THE HUMAN BODY AND HOW IT INTERACTS WITH CBD

Every mammal has a modulatory system in their bodies known as the endocannabinoid system (ECS) that controls our physiological, biological, and psychological responses.

When the proper levels of CBD are attained, your body, mind, and spirit are in balance. This state of homeostasis is a fundamental foundation for well-being.

The endocannabinoid system also influences our circadian rhythm and sleep patterns. Those not sleeping enough are going to feel more fatigued during the day, negatively affecting the desire to exercise and be generally productive. Getting back control over sleep is critical for protecting the brain and leading a healthy, active life.
